ABOUT ME

I love tinkering with both hardware and software, and figuring out how it works and can be used. I also love troubleshooting issues through various methods, such as looking into log files or trying different configurations/settings, which I can dedicate and spend multiple hours or even days on.

SKILLS AND SCHOOL

2022-?: Education on Data Technician with specialty in Programming at TEC in Lyngby. Introductory course 2.

2021: 2 months in school practice. 1 month apprenticeship at Boldt Automobiler.

2019-2020: Education as Car Mechanic at Unord Teknisk Erhvervskole. Introductory course 1 and 2. Internship for 2 weeks.

2017-2018 Been in 10th grade. Been to truckshow and virtually drove a truck. 2 days internship as truck driver at SCT.

FREETIME/HOBBIES

I am self-taught systemadministrator on two servers that I rent in Germany, where I among many things, host an email server, image gallery/uploader, end-to-end encrypted file uploader and various other small projects on my domain-name 'lobadk.com', all of which are open-source from Github and made by others. I also care a lot about digital security, with strong passwords, and 2FA systems, like a Yubikey.

In my freetime I run a mix of Windows and Linux, where I swap between Arch and Kubuntu. I am currently trying to teach myself Python and C#, by writting small programs and projects. They can be found on Github under the username 'LobaDK', or via an attached link if I sent this digitally.

This CV can be kept and redistributed
